SOFT SKILLS

Goal Setting, Communication, Social Dynamics Awareness & People Skills, Emotional Intelligence, Responsibility, Creativity, Productivity & Time Management, Confidence, Continuous Learning, DataAnalysis, Scripting, Automation, StrategicPlanning, ProblemSolving, Prioritization, Adaptability, PublicSpeaking

HARD SKILLS

Intermediate Python Skills: Proficiency in list comprehensions, streamlining code, understanding loops, functions, objects and PEP coding guidelines
Advanced MS Office Skills: Skilled in Excel data manipulation, PowerPoint presentations, and Word document formatting, with a focus on efficiency and integration.

EDUCATION

Python

Scoala Informala de IT

2023-2023

Engineering and environmental protection in agriculture

Faculty of Agronomy - IPMA

2013 - Present

Mechatronics and Automation Engineering

Technology School of Transportation Railways - High School

2008-2012

Cosmin Turculeanu

About Me

Consistently advancing my expertise, I engage in coding exercises and pursue specialized training, including advanced courses, to stay at the forefront of technological development.

WORK EXPERIENCE

Jr. Python Developer

2023-Present

Freelance

- Utilizing Python, Selenium, and Pandas, I crafted specialized automation systems customized to project needs, achieving over 80% reduction in client task durations and markedly boosting operational effectiveness.
- Venturing into SQL and deta.sh led to the creation of a rudimentary expense tracking app, enhancing my personal finance management efficiency by at least 4%, signaling an emerging proficiency in data-driven application development.
- Advancing my SQL capabilities with Streamlit, I refined the initial expense tracker. This improved version not only elevated my time efficiency by at least 11% but also curtailed my Excel usage substantially, demonstrating my dedication to crafting efficient, user-focused software.

Workflow Optimization Specialist

2023-Present

D&S Global Solutions

- Specialized in the precise engineering of workflow systems using advanced software tools, I significantly boosted process efficiency and team productivity by at least 8%.
- Vigilantly oversaw workflow operations, ensuring peak performance and seamless procedural integration within the organizational framework.
- Implemented and refined workflow methodologies that directly contributed to at least a 10% surge in the company's financial outcomes, showcasing a measurable impact on economic growth.

Regional Project Manager

2020-2023

D&S Global Solutions

- Developed and deepened collaborative relationships with both colleagues and clients, fostering a network built on reciprocal respect and aligned goals, culminating in a notable elevation of recovery rates by 15%.
- Orchestrated a harmonious team dynamic, nurturing a culture of cooperation and high productivity, which was instrumental in transforming the workspace into a more unified and effective entity, thereby boosting productivity metrics by over 4%.
- Executed strategic oversight of regional business functions, emphasizing precision and streamlined integration across revenue and production sectors. This meticulous focus on operational detail and excellence played a crucial role in advancing the recovery rates.
